

5G: Bridging the Gap between Telecom and Vertical Industries

Lisbon
January 19th, 2017

OUTLINE

I. 5G OVERVIEW

- Challenges and Use Cases
- Key Technologies

II. INNOVATION AT ALTRAN

- R&D “Triangle”
- Advanced Networks
- R&D Solutions

III. 5G: A WIDER ECOSYSTEM

- Per-Industry Use Cases
- Cross-Industry collaboration

I – 5G OVERVIEW

5G: THE NEXT GENERATION, OR A TOTALLY NEW DIMENSION?

- Diversity of service requirements

Entertainment

E/M-Health

Industry 4.0

Transportation

Energy

- Disruptive business models

Anything as a Service

IoT

Network Slicing

- Wide array of connected devices

Smartphones

Drones

Vehicles

Robots

Sensors

CHALLENGES TO BE ADDRESSED ON THE PATH TO 5G

Work Processes & Culture

- Transition to Cloud-native operation (networking + IT)
- Adoption of DevOps Agile methodologies
- Shift in Operator - Industry relation

Shift to SDN & NFV

- NFV comprehension and performance
- Coordination and orchestration in brownfield
- Multi-vendor integration

The Business Model Chaos

- Unclear player positioning
- Decentralized value chains
- Cloud & virtualization lead to new XaaS models
- IoT & privately owned (non-telco) infrastructures

B2B

B2C

5G USE CASE CLASSES

25 Gbps

< 10 ms

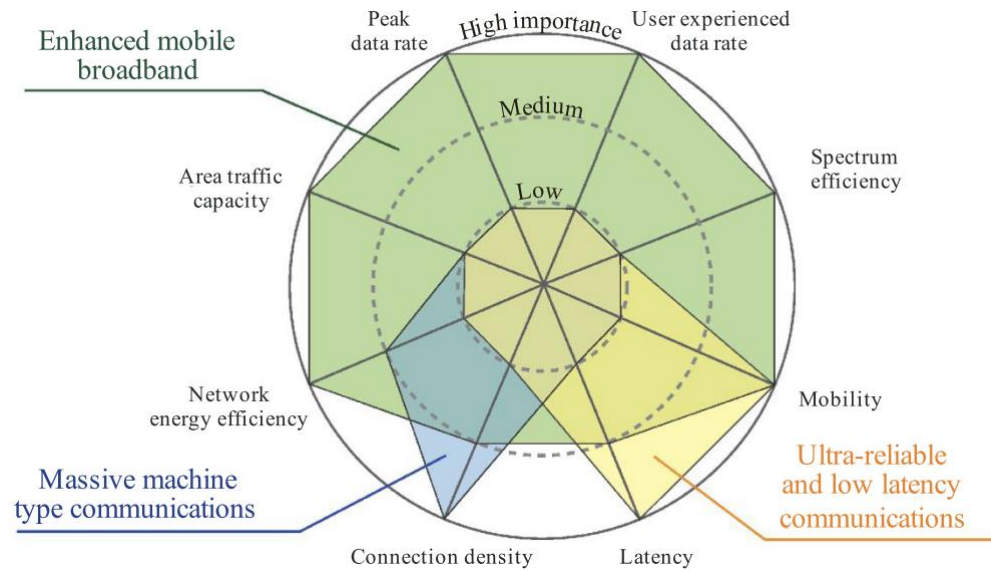

10-year battery

99.9 % available

100 dv/m²

IMT2020 service type – requirements mapping

200km/h

< 10 ms

KEY NETWORK TECHNOLOGIES UNLOCKING 5G SERVICES

Access Network

NR, mmW, licensed / unlicensed
LPWAN, LTE, WLAN
Cloud-RAN + X-Haul fibre (lots of)
MU-MIMO, Filtered OFDM, SCMA

Transport + Cloud

SDN, NFV, MEC
Network Slicing
SON

Computing

Analytics (Machine Deep
Learning, Big Data)
Orchestration
Security

II - INNOVATION AT ALTRAN

R&D “TRIANGLE”

European Projects

- Definition, integration & demonstration of vertical 5G-aligned use cases

National Projects

- E2E Service orchestration (NFV, MANO)
- MEC-based video transport enhancement

Academia

- Advanced video support
- SDN/ NFV, Cloud

ADVANCED NETWORKS

- Focus on new ways of providing **enhanced control** over the network.
- Aiming to deliver **better quality of experience** along more richness of content.

Infrastructure &
transport optimization

SDN - NFV - MEC

Management &
Orchestration

MANO

Network
adaptability

SON

Altran ranked as leading worldwide service provider
on Telecom and overall Engineering R&D services

Zinnov, December 2016

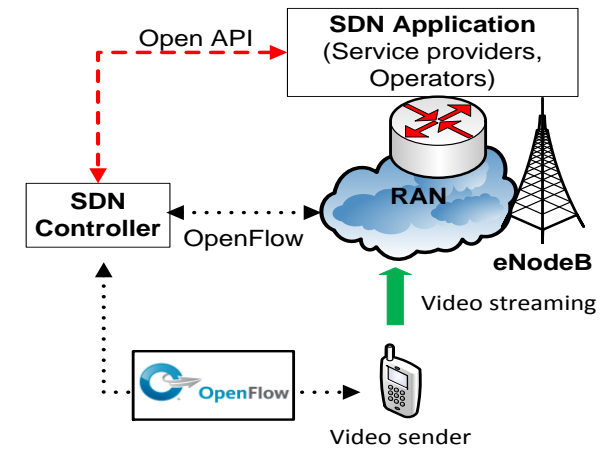

ALTRAN

CASE 1 - VDSNET

ENHANCED CONTROL OVER MOBILE UPLINK VIDEO

- Address the (now mainstream) live streaming services
- Leverage SDN to improve control over video uplink transmissions from mobile devices

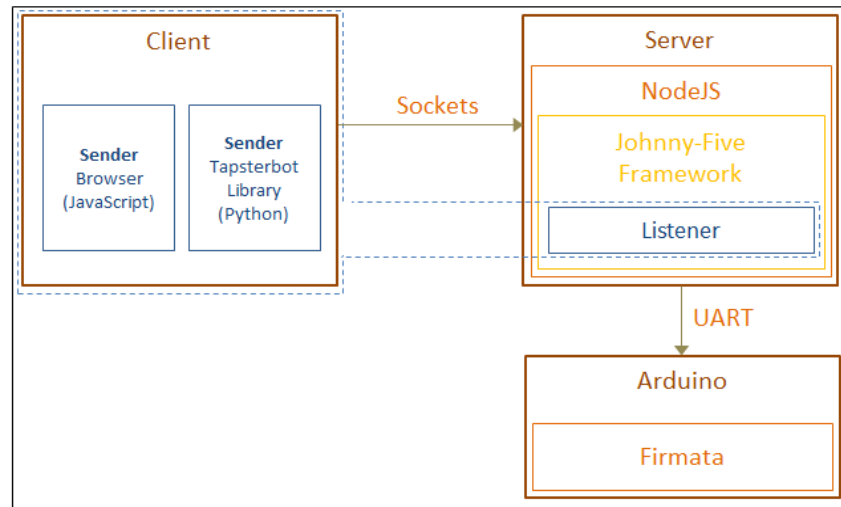

Partners:

CASE 2 - PLUTO

DEVELOPMENT OF MOBILE AUTOMATION ROBOT

- Human-Machine Interface User Acceptance Testing (HMI-UAT) over touch interfaces with computer vision validation.
- Enable remote human-emulating robotics control
- Potential applications
 - massive IoT (e.g. parallel testing)
 - mission-critical IoT (e.g. precise robotics control)

INDUSTRIAL ANALYTICS

- **Machine driven big-data** (e.g. complex analytics), transversal to all markets, will play a key role in the upcoming years
- Focus on **new algorithms** for industrial predictive maintenance, operational intelligence, etc.

Optimization

How to improve?

VueForge™ – CREATING VALUE FROM MACHINE-DRIVEN BIG DATA

Altran ranked as leading worldwide service provider on IoT technology services

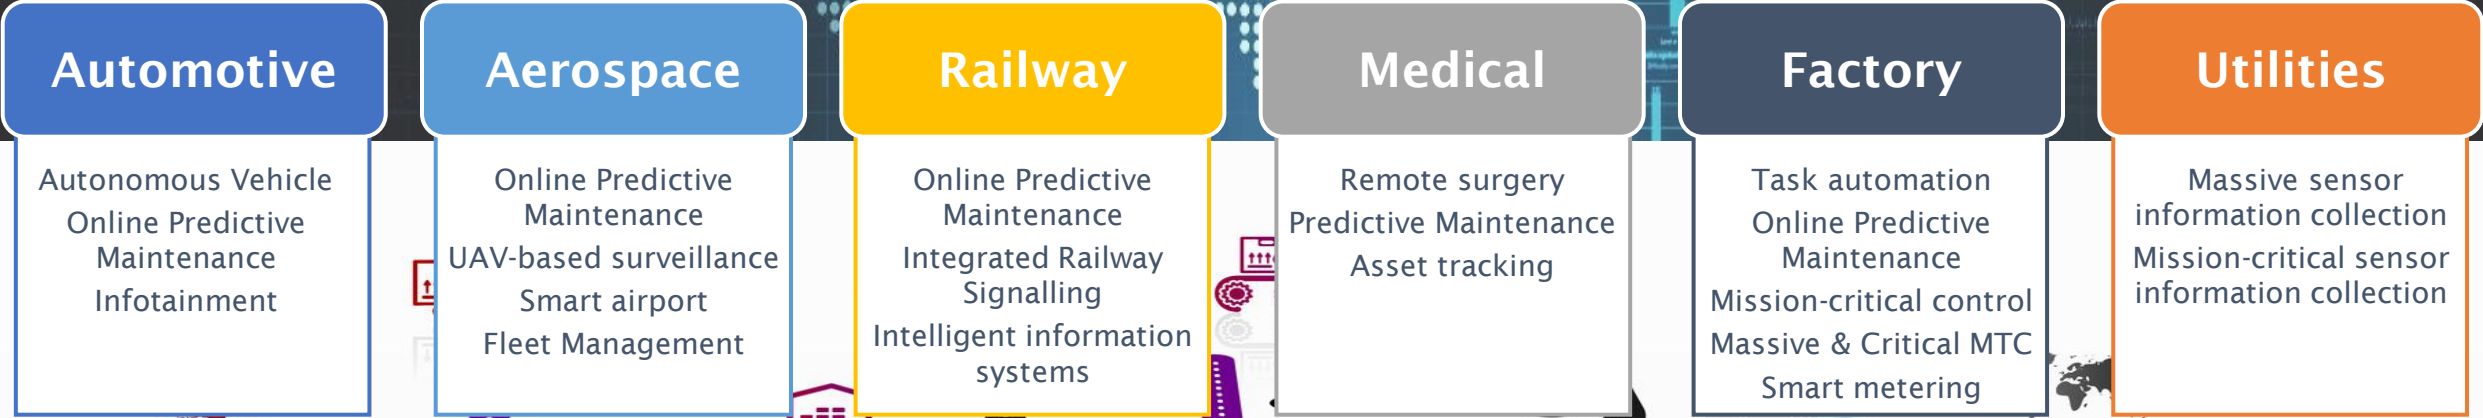

Zinnov, August 2016

The background is split into two vertical panels. The left panel is dark blue with a lens flare effect consisting of two overlapping circles and a horizontal light streak. The right panel is light blue with a complex network of white lines and nodes, resembling a data or communication network.

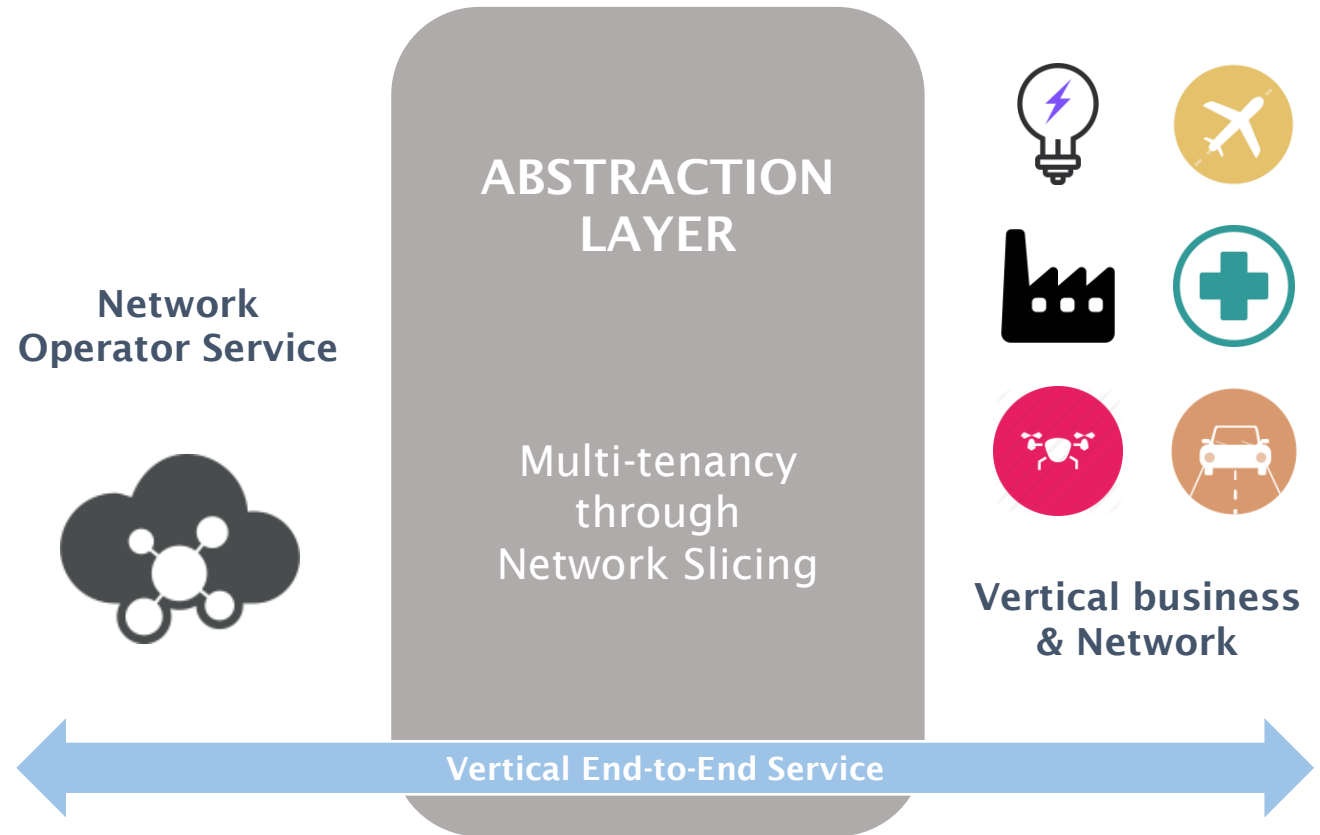

III – 5G: A WIDER ECOSYSTEM

PER-INDUSTRY 5G USE CASES

5G AND CROSS-INDUSTRY COLLABORATION

- Combine “**Telecom**” + “**Industry-specific**” know-how
- Adaptation to **new** diverse & complex **business models**
- Cooperation through the **complete technological Life Cycle**, from Use Case definition to system validation
- **New layers/ APIs** translating Vertical connectivity requirements into Network Service configuration

INNOVATION MAKERS
