

This one day summit (July 28) will provide a platform for technology leaders, innovators, and researchers from industry and academic community to collaborate and exchange ideas on emerging technologies that may help drive standardization and rapid deployment of 5G networks.

Summit speakers include eminent scholars from top universities and key industry leaders from companies such as Huawei, China Mobile, ZTE, Qualcomm, AT&T, Samsung. For the first time, this summit will be held together with IEEE 5G Tutorials (July 27).
